ARM Geophysics Announces Expansion of Geophysical Well Logging Capabilities

(Hershey, Pennsylvania) ARM Geophysics, an operating division of ARM Group Inc. (ARM), announced the expansion of its geophysical well logging services with additional trucks and down-hole tools to better serve its oil & gas clients. ARM has been providing geophysical well logging services in Pennsylvania and surrounding states for over 7 years, pioneering the use of the high-resolution digital optical televiewer (OPTV) on over 10,000 ft of wireline in 2007. ARM provides a full range of standard well logging services in addition to the OPTV and acoustic televiewer imaging services. For more information, please call 1-888-WELL-LOG or visit www.armgeophysics.net.
