

# GEOPROBE® DRILLING SERVICES

## HIGH RESOLUTION GEOPHYSICAL TECHNOLOGIES

With ARM's Model 5400 truck-mounted, hydraulically powered, direct push drilling system, it is possible to perform

drilling and sampling operations quickly and cost effectively. Our Geoprobe® patented equipment can be easily maneuvered into small spaces for the purposes of:

- Soil Probing & Sampling
- Depth to Bedrock Studies
- Lithology Characterization
- Groundwater Sampling
- Soil Gas Sampling
- Small Diameter (1" I.D.) Well Drilling & Installation

ARM Geoprobe® operators have more than 10-years of experience utilizing Geoprobe® technology to sample soil, water, air, and to install wells. They have worked on projects for both commercial and government clients.

ARM is licensed in the Commonwealth of Pennsylvania to perform well drilling and well abandonment services.

### BENEFITS

- Rapid probing & sampling
- Compact & versatile equipment
- No cuttings
- Cost-effective sampling & characterization
- Economical mobilization
- Minimal ground disturbance

For additional information about Geoprobe® drilling services please contact Beth Williams at 717-533-8600 or e-mail ARM at [bwilliams@armgroup.net](mailto:bwilliams@armgroup.net).
